DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 3, 14, 25, and 36 rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Claims 3, 14, 25, and 36 recite "wherein the incentive term is increased periodically". The Specification fails to recite that the incentive term is increased "periodically". The Examiner is unclear as to the proper interpretation of "periodically" in light of the incentive term formula found in Specification paragraph 27.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4, 6, 15, 17, 26, 28, 37, and 39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 4, 15, 26, and 37 recite the limitation "the command" in line 2 (claims 4, 15, and 37) and lines 2-3 (claim 26). There is insufficient antecedent basis for this limitation in the claim. It is unclear to the Examiner whether the phrase "the command" corresponds to "a next command" as found in parent claims 1, 12 and 34 at line 3 and claim 23 at line 4.

Claims 6, 17, 28, and 39 recite the limitation "where... n is a selection cycle number, and $N(q)$ is the selection cycle number when the q (th) command was queue". There is insufficient antecedent basis for this limitation in the claim. The variables " n " and " $N(q)$ " had not been previously recited and do not appear in the formula for $EAT(n, q)$.

Allowable Subject Matter

Claims 1, 2, 5, 7-13, 16, 18-24, 27, 29-35, 38, and 40-44 are allowed over the prior art.

Claims 4, 6, 15, 17, 26, 28, 37, and 39 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The prior art corresponds to related disk scheduling systems.
